Adoption Assessment

Challenge

Adoption and regular use of the Alation catalog are critical to data leaders achieving their goals and seeing a return on their investment.

The challenge is understanding why adoption is not what was expected and what to do about it.

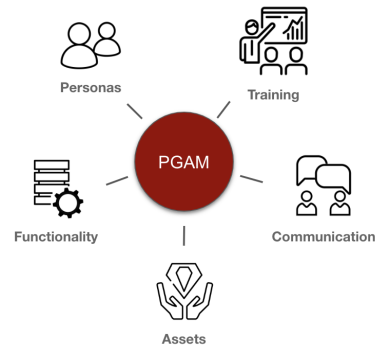

Solution

Prentice Gate's Adoption Assessment is a way to get a quick expert assessment and set of recommendations when time or budgets will not support a more comprehensive Adoption Planning engagement.

Approach

The foundation of the assessment is the Prentice Gate Adoption Model (PGAM) which is used to examine five key dimensions of catalog usage.

The five dimensions of PGAM are personas, functionality, assets, communication, and training.

Each of these is backed by best practices and maturity scores.

These dimensions are examined during each of the following key engagement activities:

- Automated survey
- Key stakeholder interviews (3)
- Review of the catalog

Deliverables

An assessment report is provided which contains:

- Key observation and scoring for each of the five PGAM dimensions
- Actionable recommendations

Duration

The total elapsed time for the engagement is two (2) weeks.

Logistics & Commercials

- All work is performed remotely
- Fixed fee engagement

About Prentice Gate

Prentice Gate's Founder & Principal is the former Alation Field CTO who authored the 400+ page Alation Book of Knowledge, authored the Right Start implementation approach, created the Alation Data Catalog Value Index (DCVI), and created the Alation policy bot design pattern.
