Governance Guidance

Challenge

The Alation catalog contains a wide and deep array of capabilities that can be applied to a data governance process.

The challenge is that it takes a long time to fully understand those capabilities and how best to apply them. This is valuable time that governance teams can't afford to waste or risk getting wrong.

Solution

Prentice Gate has a unique combination of deep data governance and Alation catalog expertise. This expertise can be used to help guide governance teams so they accelerate their implementation and avoid critical mistakes.

Approach

Prentice Gate's approach is to be used in an advisory capacity to provide guidance to the customer's governance team on a wide array of topics including

- Organizational/role design
- Catalog template & customer field design & usage
- Policy center usage
- Workflow usage
- Terms & glossary design
- Steward processes and procedures
- Lineage automation
- Critical data element identification

- Data quality design & integration
- Governance metrics & reporting
- Data element classification

Guidance is provided during meetings, working groups, and in writing as requested by the customer.

Logistics & Commercials

- All work is performed remotely
- Fixed fee retainer based on committed days per month.

About Prentice Gate

Prentice Gate's Founder & Principal is the former Alation Field CTO who authored the 400+ page Alation Book of Knowledge, authored the Right Start implementation approach, authored Alation's Active Data Governance approach, created the Alation Data Catalog Value Index (DCVI), and created the Alation policy bot design pattern.
